To All The Joy Of Hope!

YET THERE IS PEACE

"Glory to God in the highest and on earth peace, good will toward men." Thus the angels greeted men on earth, this earth which today rocks with blasts of war. It is ironical, indeed, that war should come to the land as all were preparing to observe, the birth of the Prince of Pence.

As President Reosevelt'stated on December 9, however, the United States has answered a "challenge flung" by "international gangsters banded together." Since there can be no world peace until the law of mechanized might has been abolished, until the selfish, unchristian leaders of men have become history, it is the task of the United States to rid the world of these forces

and so to provide a lasting peace of liberty under God.

But, for Christmas, 1941, yet there is peace. There is the peace of unity within the nation. There is the peace of trust in the nation's leaders. In the words of the President, (There is the inner peace which comes from those great spiritual things without which no country can win." from the East Haven Comet

Christmas Carols in the Camps

Feature American Soldier's Yule LUCKY indoed is the soldier who obtains a Christians furlough and spends a portion of his holiday season at home, but what about those hum dreds of thousands of American boys in our Army who will remain on duty in the cantonments and island bases and in garrisoning distant outposts?

The answer is voiced in a songalor a glorious hymn that will be heard from virile young throats singing the last fiscal year with an average of 97.8 persons at each service, it is

American soldier and of his fore-bears in arms since colonial camp-fires; "O Come, All Ye Ratthful," will be sung in 200 new Army chapels where this year Christmas services will be held for the first

services will be held for the nrst time.

In his spiritual life, Army chaplains declare, the citizen solder finds the closest te linking military duties with the cherished customs of his home. Especially among young men from the farming commitation and the towns and smaller cities the observance of Christmas in the camps will not be unlike the programs in churches throughout the land where friends and neighbors assemble for the Christian festival. In Army chapels the same midnight services will be held, the youthful worshipper will join in the same inspiring music, he will hear again the same messages of cheer and conflore will cell from the cliffs of Iceland and the wastes of Greenland as well as among the tropic shores of Trinidad, Guiana, and the Orient. For the Chief of Chuplains has amounced the distribution of the new Army and Navy Hymnal, a book containing the best in sacred themes, subdivided for, Protestant, Catholic, and Jowish forms of worship. Special visitations will be made to the hospitals. Neither will the inmates of the guardhouse be overlocked.

of the plants in our territory are engaged in the manufacturing or fabrication of material. Our problem, for this reason alone, is, therefore, not nearly so acute as it is in those sections where the lectro-chemical industries abound.

"The power shortage has been particulary acute in those sections depending entirely or largely upon hydro-electric power. Neighboring states would have been able to take are of the excess demands resulting from the increased defense load, but the additional shortage caused by the drought proved too much for them. Relief arrived with neavy fall and early winter rains.

"The unusual drought conditions in the Southeast through what is known as the EVA area, proved again what has been remonstrated over many years in all sections of the country, which is that water power is not a frim dependable power source. Droughts came with considerable frequency, although they do not necessarily occur in the ame sections. For example, during the past year in much of the West there was no water shortage, and yet at the same time an abnormal frought prevailed in the Southeas

"So far as The Connecticut Light and Power Company is concerned we do not anticipate any shortage unless some radical change takes paice in manufacturing facilities in this territory; or, unless we are drawn upon heavily to make up shortages in adjacent territories outside of New England; or, finally, unless generating facilities arranged for sometime ago, and already on order, are with held for reasons beyond our control.
