ANSWERS for Victory Gardeners

What Are the Most Important Enemies of the Garden? Weeds are the most important enemies of the garden. No garden will be successful unless it is defended against weeds and insects.

What Horn Do Weeds Do in the Garden? Weeds are thieves. They steal the moisture and plant food from your crop. The soil is a reservoir from which the garden plants draw their sustenance.

How Can I Prevent a Growth of Weeds in the Garden? Weeds grow from seeds. If weeds are present in the garden, they will find a crop of weeds and a crop of garden vegetables at the same time.
