East Haven, Connecticut, Thursday, October 7, 1948

Combined With The Branford Review

Two Dollars Per Year

STRICTLY LOCAL

A LITTLE ABOUT THIS AND THAT BY PAUL H. STEVENS

WORKING TOGETHER FOR GOOD

The Greater New Haven Community Chest Campaign to fill the needs of New Haven, and the adjacent participating towns, got underway this week. The needs for the services by the Chest Agencies are greater than ever before, yet at the same time the public ability to give is at low ebb due to the increasing cost of living and the demands by local, state and national governments for more taxes. We feel that the Community Chest should have a priority upon our pockethooks when we apportion our budget for the coming year, Therefore we are glad to present the following facts given us by Carl N. Hansen, lieutenant-commander for the East Haven Division in the current Community Chest Campaign:

"Last year, as we all know, was one in which the rising cost of living spiraled almost out of our reasonings. Nevertheless, there were from our town of East Haven over fifty families and children receiving aid from Family Service, Catholic Social Service Bureau, Children's Center, and Highland Heights. It has been estimated that the services rendered these persons cost the Community Chest Agencies approximately \$4,000.

East Haven persons numbering 680 received either public health nursing or dental care and residents from East Haven spent over 3,300 days in Grace-New Haven Community Hospital. Community Chest cost is estimated at over \$3,600.

"Well over 1,000 boys and girls from our town participated in such organizations as Boy Scouts, Girl Scouts, Y.W.C.A., Y.M.C.A., New Haven Boys Club and Neighborhood Music School which are among the 31 agencies of the Community Chest Council. This represented a cost to the Council of approximately \$5,500.

'The above estimates, as determined by the agencies involved are not absolute nor, obviously perfect, but do represent a good basis of comparison with the \$3,500 raised in the town plus an additional \$4,000 from East Haveners working in the city. It is evident that the \$13,000 spent for East Haveners is in excess of the amount raised by approximately \$5,500."

When the campaign workers come to your door or to your place of business or employment remember that this is one of those opportunities when you can work together with others for the general the State Legislature.

Mrs. Filler has served East Haven

OVERCROWDING IN THE SCHOOLS

For a number of years now those close to the situation have stitutional Amendments Committee known that East Haven would be cramped for school space unless and clerk of the Committee or something was done speedily to remedy conditions by providing Cities and Boroughs. She is a vice

We have said in these columns many times in the past four years that the high-tide of war babies together with the new families mov- the Order of Women Legislators, and ing into town would begin to be felt in the school system along about president of the New Haven County 1948 in kindergartens and that it would continue all through the Republican Women. She was a delegrades for the next few years. These predictions were based upon gate to the recent Republican configures prepared by those who are close to the school situation. Vention at Philadelphia where Gov. Throughout the post-war period Supt, of Schools William E. Gillis Dewey was nominated for the presibas been working hard toward convincing the powers that he of the dency. necessity of providing additional school space for the growing population of children.

It is pleasing therefore to note that the sub-committee on new liam Jaspers, who has been nominbuildings of the Citizens School Planning Committee has made its ated for the Senate this year, is a recommendations to the Board of Education following a long and prominent member of the New Hacareful survey of the problems. We do not know at this writing what ven County Bar. He has served as the recommendations call for, but we hope they will be acted upon prosecutor of the East Haven Town with dispatch, and that they will fall into the lines of best development for the future. We favor a centrally located and consolidated resident of East Haven for six years elementary school plant, well-equipped and staffed, to which the or more he came from New Haven youngsters would be brought in school busses. We believe that for a town such as East Haven a consolidated central school is the best answer in these days and in the years to come. We believe such a system would be the most économical in the long-range view. Ho ever we are not so optimistic as to expect this view of ours to be shared by a majority of other folks. After all it is only our opinion, but we have reached it after considerable thought through the

Whatever sort of building plan is adopted by the Board of Education after it has studied the advisory committee's proposals, we hope that the wherewithal for the additional facilities will be provided without too much delay, and that crowded school conditions

A MONTH OF AUCTIONS

It looks as though October will be "Auction Month" in East Hathrough October 25, is for funds to Mrs. Nathan G. Sachs, Commander, Ven. Some of the town's well known organizations have adopted this finance 31 social and welfare Division C; Nathan Sherman, Or- In announcing this year's cam method of raising funds for their various purposes this year, and as agencies in New Haven, East Ha-ganized Labor Advisory Committee paign, Mr. Ducey explained that the a result the community is right now in the midst of a household ven, East Haven, West Haven and A. F. L.; William A. Thomson Jr., need for Red Feather services dursearching from cellar to attic to dig up desirable articles, antique and Hamden throughaut 1949. Mr.Carl Commander, Division F; Harry L. ing 1949 will be greater than ever, otherwise, to be turned into each for the benefit of their favorite or Hansonis lieutenant-Commander for White, Chairman Meetings Com- that the Community Chest means ganizations.

First on the list we note is the Men's Club of Christ Church. Under the diligent leadership of George E. Munson, a committee of hold a "kick-off" meeting this Diedrich K. Willers, Commander, ough for all Red Feather services the Men's Club, is busy rounding up all kinds of used household fur Thursday night starting at 6:30 Division E. The new Executive Diniture and equipment as well as other merchandise. They plan to hold their auction on Saturday, Oct. 9, in the rear yard of the Fire gram will feature an address by liam, who came here from Evans-Headquarters Building in Main Street. and does everything but kiss him good-bye?

His wife? . . . Sure, she helped a lot-and she kissed him, tool But the co-star in this morning drama is really electricity.

All through the day, electric service does so many jobs so quietly and efficiently you almost forget it's there. But try and live without it! Yet it costs so little. As a matter of fact, electric service is by far the biggest bargain in your family budget. What else does so much — for so little? No, electricity can't kiss you. But it can do almost everything else!

Redio's great new dramatic show starts October 3 . . . The Electric Theoleri . . . CDS, Sundays, 9 P. M., EST. THE CONNECTICUT WIGHT & POWER CO.

A Business-Managed, Tax-Paying Company

As Mr. Brinley Sees It

Once again history, repeats itself, Man does not want peace, and those an ambassador of peace and who would give him peace, he will brotherly love as martyred, the hurlal of Count Beruadotte, was very sacred ground of Palestine, drinks fitting, Childhood marching with in once more the blood of a martyr, their hero, to his resting place, he The land that is made holy by the would have helped make the world Ancient people of God, the land better for children to grow up in, where the volces of the holy safer, but wicked men would not prophets of old filled with the Holy have it so. "except ye become as Chost have spoken. Saviours sent by little children, ye shall in no wise high heaven to help a people in enter the Kingdom of God A King's sorrow and distress, Jesus said to grandson, a King's Nephew, but best them ninteen hundred years ago, of all a Servant of God

phots and killeth them which are sent thee In the death of Count Union School Bernadotte, we see age old history, repeating itself again. Wasted effort. wasted strength, wasted love, and a life sacrificed. Palestine shall always be a bone of contention be-Busy Season

tween all Nations, until the great Nations on Earth, shall gather for the last and final battle of ages, the The Union School P. T. A. held the last and final battle of ages, the battle of the Armagedon. This old world is running according to God's orders, if man is out of harmony with God's plans, Why that is just too bad for man. As Students of the Word of God, we know just what to expect, the ravings of scientists, of books or press, where they fail to agree with the bible are not to be taken seriously, We have, a Compass, a charted Sea. a sure a Compass, a charted Sea. a sure the surface of the president introduced the surface of the parents, Other of the state of the parents, Other of the surface of the parents of th

A Business-Managed, Tax-Paying Company

Mary Baker Eddy logically main-

reanty. Her consciousness was less darkened than those about her by the ignorance of materiality, less earthbound and fleshbound than other mortals, more open to hear and obey. Through her God, Truth, declared His Word, made plain Ills Science to men.

Is there any reason why there should not come to this age so pregnant with progress a clear explanation, an understandable, rational explanation of God and man? Is there any reason why it should not come through a woman messenger, whose qualities of thought enabled her to receive and proclaim it? Does anyone contend that ignorance, confusion, or mystery concerning the one creative cause is a divinely decreed necessity? Then why not welcome the Science that is proving itself to be the demonstrable, rational Science which Christ Jesus taught?

Jesus Gave the Recipe for Healing

The lectures was introduced by Miss May! O. Jilison, Betcher to the church, who said:

Triends: I am a provide the course, or the church, who said:

Triends: I am a provide the course, or the church of great price", and they are easer to syread the glad tidings.

In these days of uncertainty, chaos, and despair, men and women are realizing more than over before that permanent health, pace, and harmony, are not to be attained through materia means—that the only real help for all the troubles that beset the individual the troubles that beset the individual the troubles that beset the individual and the world tody, for the fact, and set of the course of the fact, and set of the course of the same by which men could wall themselves of tod's help. After years of the same by which men could wall themselves of tod's help. After years of the world the results of her cearch in the Ohristian Science betwook, SOIINGR AND HIBAUTH WITH THE KEY TO THE SCRITTURES. In this book, all maw find the thirth about God and man, and the positive desired the course of the same the course of the same this series of the course of the course of the same this every the Science to an inouting public throughout the world for First Ohirch of Christ, Bellows, to prove for themselves and who understand its teachings and apply its rules, to prove for themselves and point of the course of the course of the same and continued and public in the positive of the same of this series of the course of the same of this same of this series of the course of the same of this same of this series of the course of the same of this series of the course of the same of this series of the course of the same of this series of the course of the same of this series of the course of the same of this series of the course of the same of this series of the course of the same of this series of The lecturer spoke substantially

as follows:

This lecture expounds the truth about God. I know you are interested in this basic, all-important subject because you are here. In an understanding of God, man's cause, we can find the intelligent power that produces health, happiness, and success. ness, and success.
If you were to step up to the first God is and where I can fine Him,"
your sanity would probably be
questioned, but it is doubtful if
you would secure the desired information. Why not? Because
mortals, generally speaking, do not
know God. They have been brought
up to believe that an accurate
knowledge of God is denied them,
Why, no one has been able to explain. There is nothing more natural to man than an understanding
of God, his source.

Christ Jesus said, "I know
whence I came, and whither I go"
(John %14). You and I are enfitted to know that too.

Reliable Information about God Is it not time to challenge the ignorance and mystery which so many mortals have come to accept men mortals have come to accept men to abandon a mere belief that there is a God, and goin an understanding of what God is, where God is, what God is doing, and how the intelligent power of Deity can be utilized by each individual to bring health, happiness, and success into his daily life.

While the Master often referred to God as Father—"my Father" and "your Father"—Jesus certainly was not thinking of the Father of us all as a magnified human personality living at some unknown address, high up in the sky, for he defined God as Spirit; and surely Spirit cannot be confined to a magnified human personality. Spirit is incorporeal and universal. The Misster said that God, Spirit, dwelt in him, and worked in him; that is, in his consciousness, indicating he understood. God as incorporeal, Is it not time to challenge the in his consciousness, indicating he understood God as incorporeal, spiritual Mind, in contrast to the material sense of mind that is the essence of all evil, fear, hate, self-ighness, sin, unhappiness, and war.

There are more people than perhaps you realize who still believe God is some sort of a corporcal, harman person living somewhere high above our earth. They forget that our earth is but one of the gazny millions of astral bodies, and a human personality, however venerable and beneficent, is, in the light of reason and of Christian Science; an impossible concept of the one universal cause. Where would such a God live to rule effectively the vasiness of creation? Would it not be impossible to find a location in the frigid ether from which He could survey the immensity of the universe; which even material sense tells us the immensity of the universe whichieven material sense tells us extends billions upon billions of miles into space?

Instead of this illogical manmades concept of Got, Christian Science defines Delivy as infinite Mind Spirit, Soul, Principle, Life, Truth, Love.

nerves of 11s own with which he sees, hears, and feels. All this mortal doing really originates in mortal mind, the false sense of mind, God's opposite. Mortals are its puppets. The thought forces with which the mortal mind animates mortals with impulse, passion, fear, hate, and everyday material thinkings are in a sense like the wires with which the puppeter controls the puppets in a puppet show. We have the puppets in a puppet show. We have a control of the order—Indiate Mind is Allin-all. This Mind is doing all the knowing, seeing, hearing, feeling, acting, and speaking. It does so in and through its ideas, the highest of which is man. All that is really being done is being done on the mittative of God, the only Mind, and is evidenced in man, Mind's manifestation. Says Mrs. Eddy, "Science declares that Mind, not matter, sees, hears, feels, speaks" (Science and Health, p. 485). On this basis Jesus-healed blindness, deatness, and all affliction. Misconceptions Hide God Misconceptions Hide God
The misconceptions of God entertained by men hide God's true mature from them. It you are holding a wrong concept of God, no matter who gave it to you, are you not walling yourself off from the true concept of Him? Clinging to a wrong concept deprives you of the right one. In "Science and Health with Key to the Scriptures," the textbook of Christian Science, its Discoverer and Founder, Mary. Haker Eddy, makes this unqualified statement which I hope you will seriously consider (p. 990): "It is our ignorance of God, the divine Principle, which produces apparent discord, and the right understanding of Him restores harmony." The cause of all discord—all unhappiness, sickness, sin, grief, injustice, and war—is our ignorance, our ignorance of God. And the remedy is what? A right understanding of God. Christian Science gives us this. Science gives us this,
Mind Is God One of the things that attracted me to Christian Science, when I was a young man looking for a rational religion, was the concept

of God as Mind, not of course the negative, evil, selfish, hateful sense of mind, but the positive Mind in which inhere sixedute intelligence and all the good, constructive thoughts and ideas, which are the most vital forces in the lives of men. This seemed to me the one and only rational explanation of the basic, intelligent cause of all that is real and eternal. What else could be universal, omnipotent, ever-available, unerring, all-wise but-the one perfect Mind or divine Principle, Love? What else could be God? bodied and environed in matter and thereby separated from God.

Christian Science that these that the only real manhood—that is of and in Spirit, Mind—is Mind-like, harmonious, and eternal; not ignorant, cellular, discordant, and temporal. It leaches that the real individuality of you, of me, and of everyone, is not a corneral body. everyone, is not a corporeal body of flesh and bones, separated from of fiesh and kones, separated from God, but is the immediate expression of God, constituted of God's thoughts, qualities, and faculties, at one with God, as the manifestation of Mind must ever be one with Mind.

Man then really has a rational states and desting it is to be Man then really has a rational purpose and destiny. It is to be the individual representative, or expression, of Mind, God's compound idea, imaging forth His unlimited ideas in the order of their lawful, never-ceasing unfoldment.

The Nearness of Mind, God The Nearness of Mind, God Consider the routh that God is Mind, which Christian Science acclaims and which you are considering. Where did it come from? Did anyone invent it? No. Where does each individual discover this Truth as did Mrs. Eddy? In his consciousness. What put it there? Mind itself, It gives this true idea of cause to you and to me and gives us the capacity to understand it. Mind is here present and active through its ideas. The Scriptures say that man dwells, abides, and is active in God. In what but Mind could man dwell, abide, and be active?

Suppose you have an unselfish desire to do a good deed for someone—be a good Samaritan—where does the idea come from? Do you manufacture it? No. You discover it, living and active in your true consciousness. What put it here? The Mind that is the source and substance of your life, your consciousness and the ideas that constitute it. Your true life or individuality is the expression of ternal Mind, and so is the true individuality of everyone.
This is the spiritual idea of cause and effect. Though we see it as yet but dimly, we see it is the truth of heing; which the one universal and effect. Another we see it is the truth of being which the one universal causative Mind gives us the ability to comprehend in the degree we surrender the material misconception of being. Man is the highest expression of Mind, or, as he is often called in the Bible, the son of God, meaning the highest individual evidence of Mind.

While the Scriptures do not often use the word "Mind" for God, they frequently make statements which could not be used were He not Mind. For instance, we are told that "wisdom is the principal thing; therefore get wisdom: and with all thy getting get understanding" (Prov. 4:7). What is the substance of wisdom but Mind? What is the essence of understanding but Mind? What makes man capable of having and expressing them but Mind?

Positive Mind Is Everywhere. Not Somewhere

In the past many mortals have believed God to be somewhere, in some place. Christian Science teaches God is unboundable Mind which is everywhere. "If," says the Psalmist, "I ascend up into heaven, thou art there: If I make my bed in hell, behold, thou art there. If I take the wings of the morning, and dwell in the uttermost parts of the sea; even there shall thy hand lead me, and thy right hand shall hold me" (Ps. 139.8-10). Mind cannot be walled out of anywhere, or fenced in somewhere. You would find it at the farihest star. It is at the depth of the deep! Universal Mind-knows no limits and accepts no boundaries. Not Somewhere

somewhere. God is the one posi-tive, unlimited Mind, universal cause, including and containing all its ideas in its infinite allness.

Just what is God doing? The Bible says that "he that keepeth Israel shall neither slumber nor sleep" (Ps. 121:4). But what is the ever-wakeful causative Mind, the source and substance of all things, doing?

loing?
In the human order mortals are

thinking, speaking, seeing, hearing, feeling, acting. Each mortal thinks he is doing these things by his own volition: He believes he has a mind of his own with which he thinks and acts, eyes and ears and nerves of his own will which he sees, hears, and feels, 'All this mortal doing really originates in mortal doing really originates in mor-

Finding Real Manhood

mornis have mistakenty believed man to be material and mortal with a good and evil mind of his own, a will, and a way, and a life pretty much of his own patterning. He has been thought of as em-

- What Is God Doing?

Unanswerable God, Mind, Is All-Inclusive God, Mind, is Alt-incusive
Within infinite Mind is its universe of ideas or identities, safe
and secure. Instead of believing
God is an important factor in creation, we must see that God is all
there really is, is infinite intelligence, Mind, in which are the
limitless manifestations of Mind
itself, all caused, conditioned, and
controlled by the divine Principle
which is their life, substance, individuality, and continuity. Says
Mrs. Eddy, "God is the sum total
of the universe" (Miscellaneous Why Break with Logic?

But here is where many hesitate, They say such reasoning is logical but not practical. One says: "I have been sick; I have suffered from wrongs done me by others; I see and hear evil in many forms about me; I know it is very real, regardless of logic. It is too much

about me; 1 know h is very real, regardless of logic. It is too much to challenge all that the physical senses say. I should like to believe evil is mot real, but whether it comes from God or not, here it is, and to me it seems very real."

That is just what I thought and kept on thinking for some time after I started studying Christian Science. One day I saw that just so long as I consented to go on thinking that way, I was simply tleing up my sense of life and self-hood with evil and mortality, claiming them as realities, mentally including myself in a bundle of negative values I really had no use for and wanted to be free from. I then began to see the truth of what Christian Science teaches, that the material sense of origin, of material parentage, birth, growth, material parentage, birth, growth, material parentage, birth, growth, maturity, affliction, and death was a misconception of life and self-hood that was entirely unworthy of a supremely intelligent cause and was therefore unworthy of and was therefore unworthy of acceptance in my consciousness as reality, regardless of how much it clamored through material sense testimony for recognition.

The master Christian called this evil;—this material sense of life, mind; had selfnood—a the and a lian. So long as I was willing to accept the lie, the material sense of mind; as cause, and its effect, material creation and mortal man, at its own inflated valuation of itself. I was altering my sense of

self, I was aligning my sense of cause and effect with what was a denial of God and the manhood made to evidence Him. . We Need Courage It takes courage, I discovered, and plenty of it, to stand up and mentally repudiate the claims of matter, or evil—and they are identical—to reality and identity. But it has to be done; and God, the real Mind, 'Llis, and Soul of the true individuality of you and me, gives us the courage with which fearlessly to do it. We must claim and use this quality of Mind so essential to the overcoming of evil.

In the understanding which Christ Jesus had of God, the lying claims of sickness, sin, and death met their master. They were confronted with one so conscious of the omnipresence and omnipotence of all-intelligent Mind, so conscious of the unity of man's only real life and selfhood with this all-inclusive; all-containing Mind, that there was not a vestige of fear in his thought because of what evil claimed. To the Mind of Christ, the consciousness rudiant with God-given understanding of man as spiritual and Godlike, evil's boasts were futile. Jesus was the human herald of the Christ, the true idea of God and man. It is this true idea of God and man effect that liberales and saves from every wrong concept of being, be it sin, sickness, fear, lack, or hate. - Mary Baker Eddy

Mary Baker Eddy logically maintained that a good cause makes a good effect, a good Cause makes a good effect, a good God makes a good, healthy, harmonious man, regardless of what unthinking mainter claims. She had courage too and aplenty. She had to have. At first no one would listen to her explanations of the Christ Science, Gradually, as a result of the healings she accomplished, a few listened, then a few more, enough to form a church; and slowly, against the skepticism of religionists and physicians and indifference from nearly all the rest, she succeeded. Today her discovery encircles the globe, lightening the hearts, homes, and lives of a great multitude. Why? Because it is true, provable, reasonable, rational, logical.

Mary Baker Eddy discovered Christian Science, the Science of Life, because her thought was more receptive than all others in her time to the ideas of spiritual reality. Her consciousness was less darkened than those about her by the ignorance of materiality, less earthbound and fischbund than Proof We Understand God One may quickly and easily learn the terms Christian Science uses for God and man. They may appeal to his sense of logic and reason. But glibly rehearsing these words is a long way from understanding their meaning. We understand God as Mind only as we stand God as Mind only as we are willing to accept as true the thoughts which express divine Mind, or Love. Good thoughts are natural to God and natural to man. This is not the self-satisfied human sense of goodness that breeds self-righteousness, but the goodness that is coincident with true intelligence, the goodness that is a quality of pure Mind, that belongs to genuine Love. We know God as we know and love good and express God's ideas, and we never know God so long as we are deceived into attempting to honor Him with our lips and dishonor Him in our lives. By our lives and thoughts we demonstrate, show forth, 'God.

Man United to God Another point that is very satisfying in Christian Science is its teaching that man really is united to everlasting Mind and is united to this perfect; divine Mind now. There is much comfort in the discovery that one's real life is not hopelessly tied up in mindless matter, fettered and limited by material embodiment, and subject to heartless, ignorant, material forces. Man is an individual mode, or expression, of eternal Mind, living to individualize the Life, Love, Truth, and good that is real being. and good that is real being.

We Understand in a Degree These truths we see as yet only in a degree. But that is something. The full measure of understanding of an ideal does not come in a moment to thought long darkened by the misconceptions of ignorant material thinking. Said Paul, "For now we see through a glass, darkly; ... but then [as our spiritual understanding increases] shall I know even as also I am known" [of God]. It means much to see something of life's underlying verities, to see how to use them to demonstrate more and more of one's unity with the living God, infinite good, and to help others do so.

Logic of Christian Science Christian Science teaches that God is the intelligent, harmonious, and good Mind, and therefore there can be no effect from this one and can be no effect from this one and only cause but what is truly intelligent, harmonious, and good. The effect cannot depart from the quality and nature of its cause. Is there anything but good logic in this? Then the conclusion follows that all evil—inharmony, sickness, contention—is not of God, divine Life, Truth, and Love, since evil is not intelligent, harmonious, or good. It therefore has no real cause and must in the last analysis be unreal.

Basis for Christian Science Treatment based on this simple procedure.
The whole objective of this Science is to enable individuals everywhere to understand the true idea of God and man, of cause and effect. Can you think of anything that can save you from ignorance of God and man but the acceptance in your thought of the true idea of God and man? Is there any other possible way? Is not this rational, reasonable, logical? The Master said, "No man cometh unto the Father, but by me" (John 14:6), that is, by the true idea of God and man which I teach.

What Is Usually Done Suppose Mr. A awakens on a winter morning with a sore throat, is hoarse, and has a tever. If he were not a Christian Scientist, he would say in effect: My material body, its nerves and material sensations, say I have a cold, so I have one. My hody tells me how I am. I shall get some meterial medicine and pour it into my stomach, hoping it will in some way drive out this unpleasant thing. Mr. A believes he is a mortal, in a material environment and hody, and that he must take what matter doles out to him and then endeavor to get rid of it by pouring some other matter into the hody which says it has a cold.

What a Christian Scientist Does What a Christian Scientist Does
But it Mr. A were a Christian
Scientist, he would do something
different. He would mentally deny
that he was really what matter
argued he was, an afflictable bundle
of material cells, subject to material climatic and atmospheric conditions. He would affirm that God
alone is the cause of man, and so
of his life, that God causes him to
be His expression and to be healthy
and harmonious, spiritual and Godlike, superior to the so-called material mind, its heat or its cold,
and incapable of being congested,
conditioned, or controlled by its
unintelligent, lawless, truthless
beliefs. beliefs.

He would cling steadfastly to the true idea of cause and effect, of God as infinite Mind and of man

as Mind's expression, and repudi-ate the false sense of cause and effect—the material mind and its

negative, mortal sense of man-see his unity with the true and his

separateness from the false, and so win his freedom. He would know the truth which divine Mind gives him the ability to know, and so would free himself from the error which has no place in intelligent Mind or its manifestation, man. Simple, rational, logical. The requisites—courage to deny what he has been erroneously educated to believe is himself, willingness to accept the spiritual idea of God and man taught by the Master and Christian Science, and humbly to conform his thought and life, step by step, thereto.

He turned to God, realized God, presence, power, and love and that his life was in the secret place of the Most High, in unity with divine Life and Love. He pondered the spiritual truths in the ninety-first Psalm; rejoiced that right in the midst of the danger God was giving His angels, Mind's constructive thoughts, charge over him to keep him in safety. thoughts, charge over him to keep him in safety.

Omnipresent Mind reassured him, bade him dress and then make a rope out of all of his bedding. Several times he started to lower the rope from the window, but the still, small voice said, "Not yet; lean on God, He will save you." Finally the voice said, "Now," and he lowered the rope and then clung to it. It reached only a small fraction of the way to the ground, but a fireman with another rope was below to said him to reach a ladder and so descend to safety.

The smoke was so dense that conform his thought and life, step by step, thereto.

The illustration applies to any form of affliction, sickness, or sin. The purpose of Christian Science treatment is, through understanding prayer, to deny feality to the unreal, the evil and discordant, and to realize reality to be God and His creation, including man. Is there anything astounding about this? Perhaps it shocks human thought and mortal self to think of denying their claim to reality, and very possibly this mind needs to be shocked until it accepts this inescapable requirement to the discovery of true being. The smoke was so dense that when he started to let himself down he could not see the fireman two stories below, but he lowered • Repudiation of Material Self

one of its worst hotel fires, in the hotel a Christian Scientist was trapped by the smoke on the tenth floor. Escape seemed impossible.

He turned to God, realized God's

himself at just the right time to be

Many may seem trapped by evil

Many may seem trapped by evil forces sometimes called sickness, sin, unhappy environment, and discordant relationships, but: God is always at hand to show the way to freedom. Our part is to pray, listen, and obey. The one in the hotel fire prayed, listened, and obeyed. Learn to do that. God's voice is often still and small and, as the Bible writer discerned, sometimes it is as when a lion roareth. But it is ever speaking to us. Through humility we can hear our wise and loving Parent say, "This is the way, walk ye in it." Mind, God, Love, is always articulate, and God's voice is really the only, voice that is speaking in

only voice that is speaking in Truth's kingdom. There is none other for man to hear.

Pray, Lisien, Obey

Necessary The principal work is to over-come, to surrender and get rid of, the false material sense of self which is evil's only agency for self-assertion. We must choose our status—either as a physical puppet of the so-called mortal, material mind, responsive to its suggestions status—either as a physical puppet of the so-called morfal, material mind, responsive to its suggestions of fear, hate, selfishness, resentment, sickness, animality, and lack, or as the individual expression of the Mind or Intelligence that is God, having no other parent, responsive to no will but the divine, daily expressing obedience to the Principle that governs the universe.

Christ Jesus said to those who were wanting to follow in the way of spiritual life he laught, "If any man will come after me, let him deny himself, and take up his cross, and follow me" (Matt. 16:24). First, do we have a deep, sincere desire to follow the Master's teachings and to do the good which he did? Then if we do, we must deny material self, deny any reality in the mortal, material, selfish, proud sense of selfnood, because it is the denial of God's man.

other for man to hear.

Regardless of how deep a wilderness you may seem to be in, if you will persistently deny false material sense and self and understandingly claim your sonship with God; if. you will pray, listen, and obey, God will show you the way. "Fear thou not; for I am with thee: be not dismayed: for I am thy God," says the Bible, "I will strengthen thee; yea, I will help thee; yea, I will uphold thee with the right hand of my righteousness" (Isa. 41:10).

Too often we do not pray fer-Self-Will, Our Worst Enemy Self-Will, Our Worst Enemy
Let' us stop the futile effort of
trying, as material self often does,
to will our way through life, stop
being like the parrot that echoed
its owner's poor philosophy, "I
want what I want, I want what I
want." It is this ignorant, blind
human will that Mrs. Eddy calls
"the motive-power of error" (Science and Health, p. 597). It wrecks
lives, homes, businesses; it blocks
progress and threatens the world's
peace. ness" (Isa. 41:10).

Too often we do not pray fervently, persistently, understandingly. Too often, if we pray, we do not listen for the resulting inspiration and our Father's guidance.

Many times, if we pray and listen, we fail to obey. We do not like God's way and in willfulness turn from it. How slow we sometimes are to learn that we cannot improve on the way of God's wise, loving, and constant appointing for His own. procress and threatens the world's peace.
One form of human will is to be determined to have one's way in dealing with others, disregarding what is God's will for man. Another form is to be willing to be apathetic to God's control, to be willing to accept and condone bad habits, old grudges, and continuing enslavement to ignorance of God and man. Human will is our worst enemy. The antidote is the understanding of God, and man as His expression, found through humility, or the willingness to let the Mind that is God be the one guiding influence in our lives.

By Prayer We Communicate

with Ged

By intelligent prayer we communicate with and find God.
Prayer is simply the spiritual right-mindedness which denies the wrong material sense of cause and effect and affirms and thinks in the control of the time idea of God and

terms of the true idea of God and

Daily Prayer for Oneself Essential

I early learned in Christian Science that daily prayer for myself

was a first, never-to-be-neglected duty. Prayer keeps the window o

our consciousness clear, so that spiritual light can come in and enable us to be uplifted ourselves and so be better able to help others.

Deliverance by Divine Communication

Communication

Communication between deific Mind and man is natural. The means for this communication is thought, and it is quicker than any human form of communication. It is instantaneous. Mind's communications are never distorted or delayed, because nothing can oppose the omniaction of Mind. Spiritual intustion is one means of Mind's communication.

Here is an illustration of the way deific Mind communicates with us to save us from the negative forces of fear, ignorance, and destruction. Not long ago the United States had

More Light in Dark Places More Light in Dark Places:

An understanding of God is what is most needed to solve the international problems that confront the world. The dragon of wrong-mindedness that struts up and down in the earth, seeking whom it may dominate and control, must not be allowed to frighten us, regardless of the name or organization, political or otherwise, under which it may operate. In the crucible of human consciousness the wrong and poisonous elements of human thought must be brought to the surface before they can pass off into oblivion. That process is under way. Ing influence in our lives.

Remember that the first quality Remember that the first quality the Master mentions in the Sermon on the Mount as essential to our finding God's kingdom is humility. Said he, "Blessed are the poor in spirit: for their's is the kingdom of heaven" (Matt. 5:3). The poor in spirit, those free of human will, stubbornness, and egotism, are the ones to whom the kingdom, where God's wisdom and love govern, becomes a reality.

under way.

More of the light of intelligence, of unselfed divine Mind, is shining in dark places than ever before. The area in human thought where evil can seem to operate and dominate is narrowing, for the influence of Mind's ideas is growing. The carnal mind is being exposed in its nakedness, and desolateness. Its nakedness and desolateness. Its hidden motives, malign and willful purposes, and false aims are exposed to the light, and the ways for intelligently determined as the benefit antihumass of as the terms of the true idea of God and man. "Prayer," says Science and Health (p. 2), "cannot change the Science of being, but it tends to bring us into harmony with it." True prayer brings you into harmony with the Science of being. Prayer is the life line God has provided for each of us. Are we using it? Prayer unites thought with God; nothing else will. You will never find God except through the prayer of right thinking and right living.

Power Belongs Only to God
One well informed on the underlying purpose of certain political influences so rampant today describes them as "a universal plot for the violent selzure of power."
But a long time ago a Scriptural writer saw the futility of such purposes and said, "Who is he that saith, and it cometh to pass, when the Lord commandeth it not?"
(Lam. 3:37.)
Evil is confined in its own finity. Outside of its realm of supposition it can never go. Mortal mind is pure delusion. Never forget the unalterable truth stated in Science and Health. "The only power of evil is to destroy itself. It can never destroy one iota of good" (p. 186). Supposititious evil threatens and conspires, but it can never thwart the steady progress of the true idea of God and man, demonstrated by Christ Jesus and today revealed in Christian Science, which is divinely destrict to whe collection that the steady to the still sell section of the called the subset of the sell selling in the selling in the steady progress of the true idea of God and man, demonstrated by Christ Jesus and today revealed in Christian Science, which is divinely destrict the subset of the subset o Power Belongs Only to God and so be better able to help others. Understanding prayer shuts the door on the evil suggestions of fear, friction, sickness, and sin that would camp in our mental homes. It opens thought to God's guidance and assures us of God's protection. In his daily prayer one denies the false material sense of self, affirms God's fatherhood, man's sonship and unity with Him, and one's superfority to all that matter and mortality claim. Christian Science, which is divinely destined to rule all nations absolutely with the rod of iron referred to in Revelation, the absolute authority of divine Mind, the cause of all reality.

The All-Important Thing Eliphaz gave to Job the wisest counsel which one individual can ever give to another. Let us accept it as just that for ourselves. It is this: "Acquaint now thyself with him [God], and be at peace: thereby good shall come unto thee... If thou return to the Almighty, thou shalt be built up", [Job 22:21, 23).

Let everyone go away from this lecture mindful of this wise counsel restated thus by Mrs. Eddy in "Miscellaneous Writings" [b. 151): "Brother; sister, beloved in the Lord, knowest thou thyself, and art thou acquaintace with God? If not, ... delay not to make Him thy first acquaintance."

Over a year ago, following Branford High School's successful defense of its Connecticut Interscholastic Athletic Conference crown in basket-ball; as a writer was gathering his notes and typewriter, a member of the red and white's cheerleading staff passed by and the expert, who pigskin team will have its chance to bailed from Heriford, muttered, but to himself "That could be one of hailed from Harkford, muttered, half to himself, "That could be one of the reasons Branford won",
He hit the nall on the head. She and nine other girls set the pace

He hit the nall on the head. She and nine other girls set the pace the first time when the relative for victory. Their zest and desire for a local decision was transferred to the two schools renew their rivalry the team in that strange undercurrent of feeling called, school spirit.

That feeling was not haphazard. It was organized. Each time out the arcs at 8 P. M.

was the signal for a short cheer for the team. Each intermission was utilized for intricate pattern work, ending with a Branford exhortation.

High in the stands, the crowd gave with its unison yells, unconsciously supporting the pleas of the yell queens.

The name is appropriate for in their lovely, and original, cheer costumes, the girls were a pretty picture. Their appearance was not the showed the dopesters that it intends sometimes should sweater girl sight so familiar to the sideline fashion to use pin point accuracy in testing sometimes snoddy sweater girl sight so taithing to the should be use pin point at of many schools. Instead they were tastefully uniformed in the vivid Branford's mettle.

stylings of the fashion book mind of Emily Nygard. ings of the fashion book mind of Emily Nygard.

The credit for the transformation of the cheer corps rests with the have Coach Waren Sampson's word local athletic director for girls, Miss Virginia Moessmang. Each year since for it, that with his acc signal caller she first appeared in Branford, some five years ago, the atmosphere of and co-captain, Joe Petela, in the she first appeared in Braniord, some five years ago, one temporaries and co-captain, for Feera, in the the school, its athletes and the town, has become surcharged with spirit, tilt, East Haven may expect eleven the direct result of the confidence she has instilled in the cheerleaders and which they, in turn, have transmitted to the student body, which by its intensity gives the team that added lift needed in the heat of a

Miss Moessmang is a citizen of this town by adoption. It makes no difference whether she has adopted if for it has accepted her.

Like coach Warren Sampson, she spends many hours, in her own way, biting her Angernalls to the clow, worrying over the fate of a

An injury to a Petela, a Chandler or some unknown substitute gives her anxious moments of distress. A Branford victory is an excuse to analyze the fine points and the shoddy misplays of the Hornet team. Had she been a boy, she would have been a fine quarterback, because she invariably has a reason for the team's action and, in her own particular life, for every thing which she tries. No coach in the world can dominating tackle play gives Samplast a play director if he has a reason for attempting his move even though the results are disasterous. A thinking player is a tremendous asset. No one guesses one hundred percent right.

The patterns of the cheerleaders are—for the most part—the crea—for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt maples well for the major portion of the tilt major por

The patterns of the cheerleaders are—for the most part—the creations of the yell queens themselves. Each fall, new ideas are discussed and new cheers devised. No two yells are given under the same paragon. The styles run the gamut from the heavy, ponderous locomotive yell to it at al. lightfooted, truckin, dancing steps which lead the modern cheers.

The latter, by the way, generally are used when Branford is leading else a short snappy shout contributes to the team's support. When regularly that time in the game comes that the Hornets fall behind and decisions are going badly, then the heavy yells, the locomotive and the double

"B", become pleading songs for victory. The director is a native of Newark, Ohio. She carries a reputation of an excellent athlete. Particularly agile, she was a crack basketball player at her home town high school and at Boston University where she attended Sargent College of Physical Education. She is a nifty tennis player, at one time she was a court counselor at a girl's camp, after graduating from college. In field hockey, too, she enjoyed a similar reputation having played with the Northern New Jersey Field Hockey

She has held positions in the physical education departments of Tiltonsville, Onio high school and in a private school at Orange, N.J. Even today, she continues her studies during vacations at Boston University Summer School.

Not alone on the fields of athletic strife does Virginia Moessmang star, because on several separate occasions, over the past two years, she has been called upon to make public appearances on the needs and essentials that physical education would require in the proposed new public school building. Each time she has acquitted herself well and not always before an exactly friendly audience.

She has instituted play days for the girls of the Branford School

system and they have been remarkable in the promotion of fellowship among the student bodies, particularly girls, of the surrounding towns.

The hard working athletic director admits that the system for the

play days is not perfect. She would like to see more of them taking part, At present, she says, only those girls who can pay their own expenses can make the out-of-town trips. There is no provision for girls' outside activities at the school. Even the sweater awards, given annually to the girl who gains the most number of points for athletic proficiency, must come from the scant dollars intended to cover boys' activities.

Confusing in this playday activity are the so-called sport days. The instructor says that the former occur when individuals from all schools make up the competing teams. Sport days are those occasions when each school competes against one another. The activities include practically all girl's sports from field hockey to softball with ping pong and basket

ball included in the year's program. A new activity has been started at the high school this fall. For the first time in Branford's school history, twirling majors are going to head the band, Daily, nearly a dozen majorettes are practising the artifices of baton swinging. Moreover they are getting good. But don't mention the uniforms to the Ohio miss because she doesn't know where, or how, the materials to make the costumes are coming from. It is a bet that

she will find some way to produce the needed apparel. It happened with the cheer leaders' dresses.

The mid-west miss says that she is not a magician. Branford folks think otherwise. She does not apparently carry a wand to wave o'er a hat to produce some mumbo-jumbo trick but she has one just the same. It is the long wand of friendly sincerity. As long as she waves it over the youngsters, under her jurisdiction, action is bound to happen.

At present it is not possible to have state championships in basketball and other sports for girls. It is not even possible to meet all schools of the Housatonic League in any one sport. Therefore the only recognized public appearance the girls make is on the cheering squad—and soon, the line of high stepping majorettes in front of the new high

chool band. They are positions of honor. Among the cheerleaders only high standing students in physical edeation can hope to make the squad. They are carefully trained and nust carry a spirit of vivacity as well as alert minds and strong bodies. One freshman, two sophomores, three juniors and four seniors comprise the squad. One, a senior, is head cheerleader. Practices are held just as faithfully as are those of the football team they exhort to greater doings.

Throughout scholastic circles they are recognized as supreme; in comeliness, in precision, in spirit and good sportsmanship. Although the school reserves its cheers for the team, the town is allowed a long one for its citizen by adoption. All together, gang,

Explodes Sat.

Coach Fletcher Ferguson of The Collegiate School is hoping his acc backs, Bill Hinchey of Branford and Tony Ricciardelli of New Haven, will explode with some fireworks next Saturday when the Blue and Gold meets Admiral Billard Academy of New London. The team plays at 10 o'clock on the Edgewood Field, New Haven.

The Prepsters, without too much practice under their belts, have dropped two hard-fought contests. Rhode Island State College freshmen took the opener, 20-0, but Collegiate came back last week to be edged 6-0 by a strong Dean Academy

and co-captain, Joe Petela, in the lift, East Haven may expect eleven mobile tanks probing for weaknesses in the vaunted Eastle forward wall.

Branford High has proved its ability to gain on the ground. The coupled with Al Karlowicz' 314 en-eked out a 13-7 triumph to even the margin to the tally as the upstate guarter. Bob Boutsilier and ten good performances, staged late in the final quarter gave yards for pay dirt territory. His attended the wallingford Nutmegs its score tempted placement.

A dazzling run of seventy yards by co-captain Joe Petela paved the way for the 6 to O Branford win over Derby High in a dogged contest in Coon Hollow in the latter town last Saturday afternoon.

Long runs were the key to the afternoon's play and the Branford ace was supreme as he twice traversed over seventy yards to score but saw a clipping penalty wipe out his most spectacular dash of eighty-odd yards in the second

half. The winning spirit occured in the second canto when the co-captain At Laurel Debut on a beautifully conceived and A brilliant forward passing game, and legged it three score and ten
